BEST PRACTICE-II
Learning Management System**

1. Title of The practice:

“Learning Management System”

2. Objective of The practice:

A learning management system is a type of software that houses training material in a variety of forms and tracks what students are learning over time. Essentially, an LMS delivers educational content to its users in a centralized location.

So, the noble objectives of the practice are:-

- To give access to a pool of resources
- To eliminate the traditional barriers
- To make learning effective
- To effortlessly blend in technology
- To give the privilege of accessing content anytime
- To considerably save time, energy and money
- To customize the learning sessions as per the requirements

3. The Context

To make it easy for students to get all the study materials and question papers and to enable students to easily access to study anywhere in their free time Learning Management System has been introduced in our college. As well as, if they miss the classes they often faces problem to collect notes assignment etc. So the contexts of introducing LMS system are:

- Support efficient distribution of class materials
- Resources in a variety of formats
- Transparency on feedback

4. The Practice

Vidnyan Mahavidyalaya, Malkapur has been uploaded study material, assignments, previous year question paper and internal test on college website in the form of pdf and video link by using LMS. Students can easily access their year-wise, semester-wise, subject-wise content. Teachers can upload their content in the pdf or video link format. All the content is constantly updated according to syllabus changes. There are total 1836 contents are uploaded

on the college website till now. The department wise number of contents uploaded on website are as follows.

Sr. No	Department	Quantity
1	Chemistry	437
2	Botany	326
3	Mathematics	824
4	Physics	60
5	Computer Science	189

VMVMLK IQAC Software / Learning Management System

Learning Management System (LMS)

An LMS is a platform for digital learning. Typically, a learning management system provides an instructor with a way to create and deliver content like Notes, Video Lectures to Students. The primary use of a learning management system is for knowledge management.

There are following way to upload your content in LMS.

1. Upload the Google Drive Link of E-Content (Notes).
2. Upload the Google Drive Link of Video Lecture.
3. Upload the Google Drive Link of Pratic Test.
